

Level Up Your Business Communications with Premium Touch Screen IP Phone, iPECS LIP-9070

Ericsson-LG iPECS LIP-9070 is a premium desktop video phone with multi touch user interface. Its easily accessible and multi functional video solution provides unlimited benefits to diverse users from remote workers, managers to executives.

Advanced business communications terminal

The LIP-9070 is an advanced business communications terminal that employs SIP (Session Initiation Protocol) standards to control and manage real-time communications. The phone employs a Mini-tab running the Android OS as a display and user control interface. The SIP Phone application is permanently installed and provides the user with access to all the features and functions of the SIP Call server host plus the interaction with other communications aware apps with a truly intuitive user touch interface. In addition, the Mini-tab is loaded with apps for Contacts, Calendar and Video, etc. to improve your productivity and usability.

Integrated UCS Client

The iPECS UCS (Unified Communications Solution) Client for LIP-9070 is an LIP-9070 application which operates in conjunction with the iPECS UCS Server, expanding and enhancing the communication services of iPECS to dramatically improve business productivity and customer responsiveness. In addition to the rich voice services available with the iPECS system, text and collaborative services. The available services include Presence, Calling, Instant Messaging and more. Employing a simple intuitive graphical user interface, the UCS Client has access to both private and shared contacts and directory database applications that are fully integrated with the various services available.
